

# Current Usage of DJI Drones

## in Ukraine

- There are hundreds of DJI Mavic drones currently being used by fighters of Ukrainian forces
- Users love DJI Mavic's portability, ease of use
- Building a solution on top of familiar hardware simplifies integration

Using a smartphone attached to a remote controller for a drone, a fighter in the Ukrainian forces conducted surveillance over Irpin, outside Kyiv. The fighters used the drone to spot ambushes as they worked to clear out Russian forces from the embattled suburb.
