

# Roadmap

## 1. Oracle

- Programmatically controls drones scattered in the area
- Displays aerial footage from the drone on the map on Fighter's displays

## 2. Raven

- Recognizes humans and vehicles on aerial footage
- Displays markers on AR view on Fighter's displays

## 3. Tempest

- Self-contained in-field server
- On-board control software for the drone
- Advanced communication

# Deliverables

- 6 months
  - 100 drones/500 fighter's displays are in use
  - 4 engineers
  - Pilotless aerial vision for individual
- 12 months
  - 500 drones/5000 fighter's displays are in use
  - 7 engineers
  - ML/CV recognition of the ground targets
- 24 months
  - 2500 drones/20 000 fighter's displays are in use
  - 12 engineers
  - Command/tactical features of software
